PRODUCTION CODE SYSTEM

We utilize a production date code system, which indicates the date on which the product was packed. The following information will help you understand this coding system.

The production code consists of a **letter** at the begining of the code to represent the **year of production**, followed by two digits indicating the **month of production**, then two more digits to indicate the **day of production**.

Our coding system, implemented in the year 2000, set A to represent the year 2000, B for 2001, C for 2002, and so forth.

Using this Roland® Wild Rice bag (left) as an example, the code **S0317** appears on the back. This bag of wild rice was produced on **March 17th, 2018**.

S 03 17

Year: **2018** Month: **March** Date: **17th**

S0317 = This bag of Wild Rice was produced on **March 17th, 2018**.

More on the alphabet & corresponding year:

A	B	C	••••▶	U	V	W	X	Y	and so forth...
(Starting) Year 2000	Year 2001	Year 2002		Year 2020	Year 2021	Year 2022	Year 2023	Year 2024
